70.05.05 Purpose

Beaverton's Community Vision calls for a vibrant Downtown that is the social, economic and cultural heart of Beaverton. Downtown Design District regulations are intended to create a recognizable, vibrant, walkable mixed-use downtown.

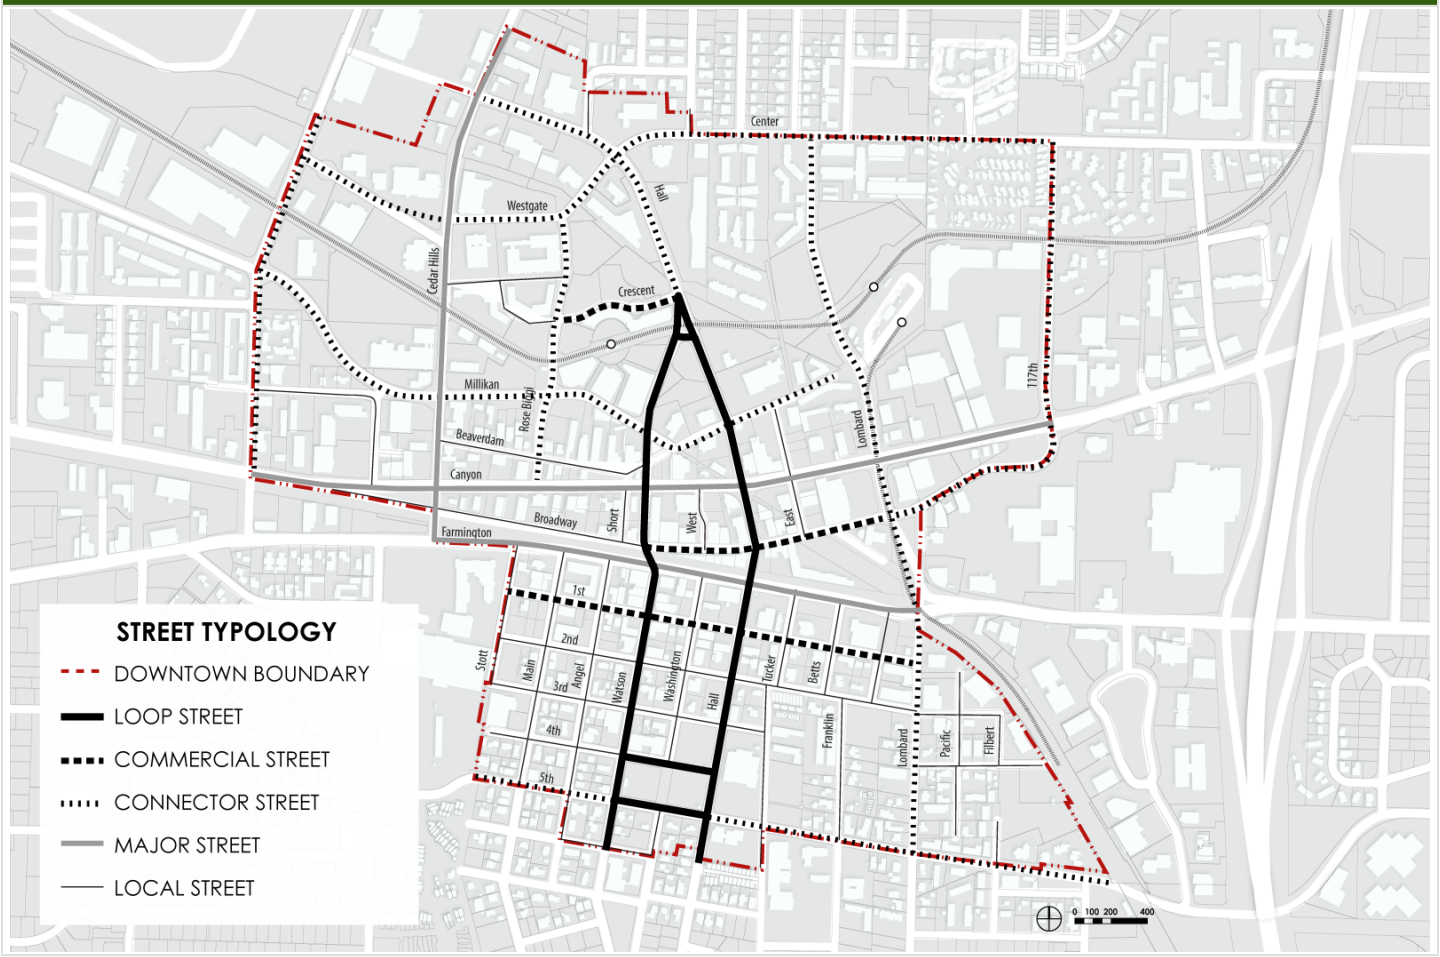

Pedestrian-oriented, mixed-use environments are encouraged with development featuring:

- Concentrated services and amenities;
- Safe and comfortable connectivity using a variety of ways to move around (walking, biking, rolling, riding transit, using automobiles and moving freight);
- Ground floors that engage streets and sidewalks;
- Room to bike, walk, and spend time outdoors;
- A diverse and dense mix of residential, office and commercial uses; and
- An authentic sense of place and identity.

CHAPTER 70 helps promote these outcomes by providing development rules encouraging development in Downtown that adds more jobs, housing, cultural facilities, and places to gather while setting site and building design expectations. The intent of these rules is to provide baseline expectations for new development while allowing for innovative, inspiring, high-quality urban design and architecture which will complement and reinforce Beaverton's Community Vision.

The Downtown Design District boundary is shown in Figure 70.05.05.1 Downtown Design District Boundary.

Figure 70.15.15.1 Street Typology Diagram

1. **Determining Primary Frontage.** For provisions of this code referring to Primary Frontages, the Primary Frontage shall be determined as follows:
   A. Sites with one frontage: The primary frontage shall be the street facing lot line.
   B. Sites with multiple frontages: The primary frontage shall be the street facing lot line with the highest level typology ranked in the following order:
      1. Loop Street
      2. Commercial Street
      3. Connector Street
      4. Major Street
      5. Local Street
   C. If abutting streets are designated as the same Downtown Street Type, the primary street may be determined by the applicant.

Effective on: 1/8/2021

70.15.20. Downtown Use Regulations

Buildings fronting on streets identified in Figure 70.15.25.1 shall have uses occupying ground-floor spaces consistent with the designated frontage type. Only tenant spaces fronting the designated streets shall be subject to these rules. For a tenant space to be considered fronting a street, the facade must be located within the minimum and maximum setback as defined by the underlying zone. Ground-floor spaces not fronting on streets designated in Figure 70.15.25.1, as well as all upper-floor and below-grade uses, shall be regulated by the underlying zone.

Buildings subject to the Active Ground-floor Land Use Regulations shall comply with the following provisions:

1. Ground floor uses in buildings with facades within the maximum setback of frontages identified in Figure 70.15.25.1 shall be consistent with the land uses listed per each frontage type.
2. Active ground floor uses shall occupy the minimum percentage of the building frontage for each frontage type identified.
3. Active ground floor uses shall have a minimum depth of 25 feet measured from the street-facing facade.
4. Buildings with facades within the maximum setback of frontages identified in Figure 70.15.25.1 shall meet all applicable regulations of Section 70.20.10.6 Active Ground Floor Design.
5. Tax lots 1S110CC00400, 1S110CC01300, and 1S110CC01303 are designated Area D and shall be subject to the rules of Table 70.15.25.A Active Frontages Table.
6. Tax lots 1S110CD00900, 1S110CD01300, 1S110CD00790, 1S110CD01301, 1S115BB00203, and 1S115BB00200 are designated Area E and shall be subject to the rules of Table 70.15.25.A Active Frontages Table.
7. Mixed-use buildings with multiple frontages designated as Type A, Type B, or Type C streets, in any combination, as identified in Figure 70.15.25.1 Active Frontage Use Map, shall be permitted to have residential units on the ground floor on all except one frontage that is within 20 feet of the street. All other frontages shall provide ground floor uses consistent with Table 70.15.25.A Active Frontages Table. The ground floor residential units within mixed-use buildings with multiple frontages along Type A, Type B, or Type C streets shall be located along the least active street designation, with Type A being the most active street designation and Type C being the least active. For example, if a mixed-use building has frontage on a Type B street and Type C street, the ground floor residential units shall face the Type C street. [ORD 4857; October 2024]

Active Residential Frontage (Portland, OR)

Ground floor residential units create an active ground floor. Units are elevated from the sidewalk grade and include individual entries, landscaping to create privacy and a transition from the street and weather protected front porches.

Active Restaurant Frontage (Seattle, WA)
Non-Residential buildings can create active ground floors through using transparent glazing and locating uses that provide visual interest to enhance the pedestrian experience through visual connections between inside and outside spaces.
